## WHAT WE DO...

At gridX we make the world independent of large power plants. Therefore, we are building the first digital energy hub that connects decentralized renewable energy producers – such as combined photovoltaic and battery storage systems – with energy consumers. Producers can distribute overcapacity via the energy hub and receive energy if their production is low. People without own production units can even satisfy their entire energy demand through the gridX energy hub.

Furthermore, our platform changes the way energy is used and experienced. It allows you to track your current energy production and consumption, benchmark it with others, and shrink your energy costs through our intelligent energy management system. In fact, we are the only energy supplier which wants you to reduce your energy usage. Join our highly dedicated team of engineers, programmers and designers on the mission to lift the world to the next energy age!

## Your mission...

- Show the world how to change to a renewable and decentralized energy system
- Educate our customers and partners on the role of energy and what the new energy future looks like
- Develop content and campaign ideas and produce excellent blog articles as well as info graphics
- Create press releases and professional articles for online and printed medias
- Establish our community management on a wide range of channels, including social media, education platforms, and email

## What you need...

- You do not need to be an energy expert yet – you will learn what you need from us
- You have strong interpersonal and communication skills
- You are not afraid to break complex issues down and make them easily understandable for everybody
- You are skilled in graphic and communication design and at least one graphic design software package (e.g., Photoshop, Gimp, InDesign)
- Fluency in German, ideally also in English
- You want to be part of the most thrilling energy startup out there

## What we offer....

- A lot of responsibility from minute one!
- A competitive salary and flexible working hours + support for finding an accommodation in Munich
- Deep insights into a growing and VC-funded technology startup at the intersection of Energy, Big Data and AI
- Challenging tasks in an exciting, team-orientated company with flat hierarchies and international flair
- The opportunity to be part of the next quantum leap in the energy markets
