

Welcome to the Faculty of Mathematics and Geography

The Faculty of Mathematics and Geography is responsible for two key subjects at the Catholic University of Eichstätt-Ingolstadt. The Bachelor's and Master's degree programs run by the Mathematics department have a particular focus on mathematical economics and also have links to

business administration and psychology. The department is also involved in teacher training. The Geography department offers specializations in areas of human geography (cultural and economic geography) and tourism, as well as physical geography and environmental geography. In addition to Bachelor's degree programs in geography, it runs Master's programs that allow students to specialize in tourism and regional planning or natural hazards and environmental processes. The faculty plays a key role in training teachers of mathematics, geography, and biology, and also offers an interdisciplinary Master's degree program in education for sustainable development. Dynamic teaching, international connections, excellent supervision, and strong commitment to exciting research topics make the Faculty of Mathematics and Geography unique. We would like to welcome you to our faculty in the name of all of our staff and students!

Mathematics

- [Chair of Analysis](#)
- [Chair of Stochastic Processes](#)
- [Chair of Statistics](#)
- [Chair of Computational Science](#)
- [Professorship of Algebra](#)
- [Didactics of Mathematics](#)
- [Applied Mathematics and Optimization](#)

Geography

- [Chair of Physical Geography](#)
- [Chair of Human Geography](#)
- [Chair of Tourism/Center for Entrepreneurship](#)
- [Professorship of Didactics of Geography](#)
- [Professorship of Economic Geography](#)
- [Professorship of Physical Geography/Landscape Ecology and Sustainable Ecosystem Development](#)
- [Professorship of Applied Physical Geography](#) and KU research center [Floodplain Institute Neuburg](#)
- [Visiting Professorship of Ecosystem Research](#)
- [Honorary Professor Dr. Benno Kügel](#)

The Faculty of Mathematics and Geography is responsible for the didactics of

- Biology/Chemistry
- Geography
- Mathematics
- Physics

It is involved in training teachers of geography and mathematics for elementary schools (*Grundschulen*) and several types of secondary school (*Hauptschulen*, *Realschulen*, and *Gymnasien*), and teachers of biology/chemistry and physics for elementary schools and *Hauptschulen*.
