1 Supplementary Figures

1.1 Correlation between metacognitive sensitivity and postdecisional accumulation period

Supplementary Figure 1: Estimated postdecisional accumulation period in 2DSD and dynWEV against observed Type2-AUC

Note. Relationship of Type2-AUC as measure for metacognitive sensitivity and estimated postdecisional accumulation period for experiment 1 (top row) and experiment 2 (bottom row). The blue lines show the linear regression line for each panel. The correlation coefficients between Type2-AUC and fitted were .53 for 2DSD and .45 for dynWEV in experiment 1 and .49 and .38 for experiment 2 respectively.
