Argentine Institute of Nivology, Glaciology and Environmental Science – CONICET,  
Institute of Geography of the National University of Cuyo

### Glaciers, protective laws and inventories: Environmental conflicts and socio-technical controversies in Argentina

In their conference, “Glaciers, protective laws and inventories: environmental conflicts and socio-technical controversies in Argentina”, Professors Lucrecia Wagner and Facundo Rojas will talk about the evolution of two of the key actors in the process of the glacier law in Argentina: the scientific sector and the socio-environmental assemblies. By describing the controversies that led one of the actors to file a lawsuit against the other, we reflect on the potential consequences of this disagreement in relation to the current status of glacier law.

Veranstaltungsort:  
Gebäude **Ehemalige Reitschule,**  
**Kardinal-Preysing-Platz, Eichstätt**  
Der Zugang ist nicht barrierefrei.

Eine Veranstaltung des Faches Geographie.
