JANICK PLATE

WFI Alumnus

Head of Group “Rollout Automation” @ Vodafone

"The WFI - Ingolstadt School of Management combines outstanding teaching with practical projects in cooperation with global companies. I gained valuable intercultural experiences and insights into new topics and approaches, through the integrated semester abroad and the project work in international and interdisciplinary teams. Thus, my studies at the WFI prepared me in the best possible way for a career start in a major international corporation. Furthermore, since I got the chance to meet my current employer at a WFI event and can now profitably use the knowledge I gained during my studies as a manager in many situations, the WFI was definitely the right choice for my master's degree."

CAROLINE SCHMOECKEL

WFI Alumna

HR Business Partner
@ ProSiebenSat.1 Media

WFI was definitely the right choice for me. It has vastly helped me in my professional life. WFI offers so many options for you to find your niche. Team projects are an excellent way to learn a lot about yourself. This knowledge was formative for me in all professional roles and teams so far. My tip: Be inspired and motivated by your peers, through active networking, and above all, do what you enjoy. What are you waiting for?"

DR. SACHA KNORR

WFI Alumnus

**Director Strategic Accounts &
Solutions @ StepStone
Germany**

"I chose WFI because the focus areas offered and the topics covered were very close to the pulse of the times. Many study contents were still relevant for my professional life even after many years. In addition, I was thrilled by the atmosphere at WFI. I have very fond memories of the personal and close contact with some of the professors. The cohesion of the alumni is fun and results in a network in which you can find help or recommendations. You will always find points of contact and common topics that promote interdisciplinary exchange even after graduation."

KLAUS-ULRICH PFEIFFER

WFI Alumnus

**Partner, Auditor, Tax Consultant
@ KPMG AG**

WFI was the right choice, even in retrospect - optimal proximity to teaching and instructors and high commitment of fellow students inside and outside the university. This school played a decisive role in shaping my personal path and this opportunity is still available today. This is proven by the many graduates I met afterwards, among others as employees and customers."
