

Configuration of eduroam for Linux (Ubuntu)

1. To set up Eduroam, visit the KU Eduroam page: <https://www.ku.de/rechenzentrum/it-services/netz/wlan/eduroam/>

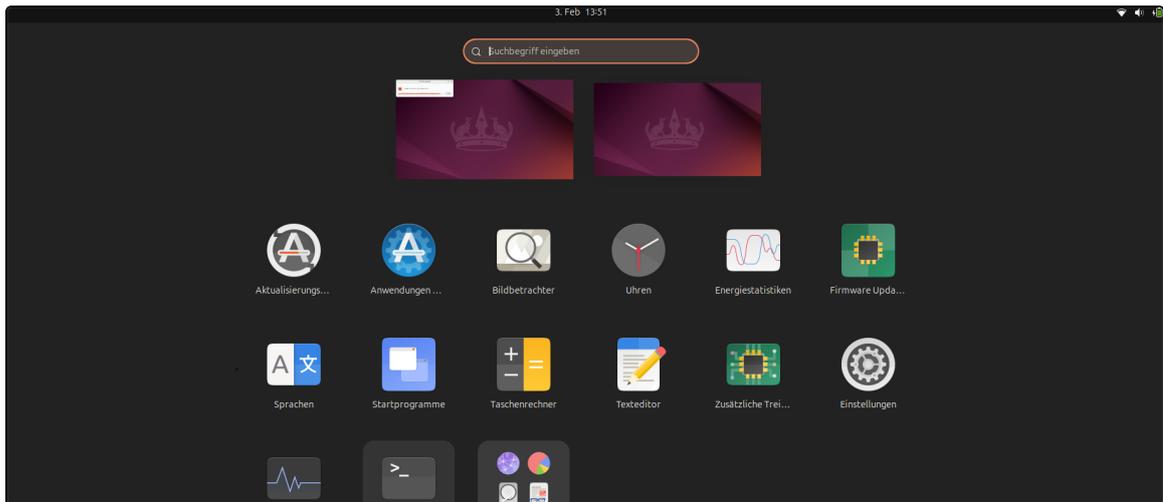

2. Follow the link under Configuration/Download to download the latest configuration file: <https://cat.eduroam.org/?idp=5710>

3. If the Linux installer does not appear immediately, click on 'Select another installer' and choose Linux.

4. Find the terminal in the application bar and open it.

5. In the terminal, enter **cd Downloads** and press Enter (if the file was saved here; otherwise, enter the command cd followed by the name of the directory) and use the command **ls** to check whether the file is in the directory and what its exact name is.

```

3. Feb 13:54
urz@urz: ~/Downloads
To run a command as administrator (user "root"), use "sudo <command>".
See "man sudo_root" for details.

urz@urz:~$ cd Downloads
urz@urz:~/Downloads$ ls
'eduroam-linux-KUE-TTLS-PAP(1).py' 'eduroam-linux-KUE-TTLS-PAP(2).py' eduroam-linux-KUE-TTLS-PAP.py
urz@urz:~/Downloads$

```

6. Then enter the command **python3 eduroam-linux-KUE-TTLS-PAP.py** and press Enter (if the file listed after the ls command has a different name, enter this name after python3).

```

To run a command as administrator (user "root"), use "sudo <command>".
See "man sudo_root" for details.

urz@urz:~$ cd Downloads
urz@urz:~/Downloads$ ls
'eduroam-linux-KUE-TTLS-PAP(1).py' 'eduroam-linux-KUE-TTLS-PAP(2).py' eduroam-linux-KUE-TTLS-PAP.py
urz@urz:~/Downloads$ python3 eduroam-linux-KUE-TTLS-PAP.py

```

7. After that, the Eduroam Cat will open. Run it and confirm everything.

8. For the user ID, enter your ID followed by **@ku.de**¹(e.g. **abc123@ku.de**²) and then the corresponding password.

1. <http://ku.de>
2. <mailto:abc123@ku.de>

eduroam CAT

Bitte geben Sie Ihre Zugangsdaten ein:

Geben Sie ihre Benutzerkennung ein

Geben Sie ihr Passwort ein

Wiederholen Sie das Passwort

Abbrechen **OK**

9. Then just go to the Wi-Fi settings and connect to Eduroam.
