

Configuration of eduroam for Windows EN

If you use Windows 8, 10 or 11, no adjustments to the client are necessary. The certificates described in other instructions are already integrated in Windows.

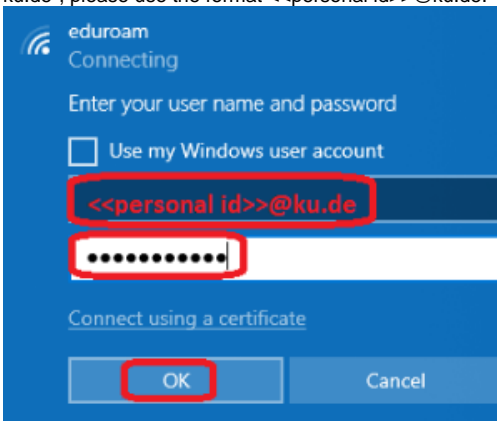

1. The connection is made with activated Wi-Fi using the displayed eduroam network:

2. By selecting the network you can connect to it (an automatic connection is optional):

3. By specifying your personal ID (+ @ku.de) and your password you will be logged in. Even if your personal ID ends with "@stud.ku.de" or "@ext.ku.de", please use the format <<personal id>>@ku.de.

4. OK
