**Please note:**

- Information on studying in more than one degree programs:  
Students may only enroll in two degree programs with admission restrictions at the same time if they can prove that they have a particular professional, academic, or artistic interest in doing so. The additional workload caused by studying two programs at the same time does not constitute a valid reason for extension of the deadline by which a program must be completed.
- Note for higher semesters of the program:  
The allocation to the respective semester of the program is made based on your application for accreditation. Once you have enrolled in a higher semester of the program it is not possible to move back to a lower semester. If you have any questions concerning specification of the semester, please contact the KU Student Advisory Service: [www.ku.de/studierendenberatung](http://www.ku.de/studierendenberatung)
