Mr. Mohammed Anwar is an experienced ESD (Education for Sustainable Development) specialist who has made significant contributions to various sustainable development and ESD international projects over the past 15 years. He holds two master's degrees: the 1<sup>st</sup> in International Educational Management from Ludwigsburg University and the 2<sup>nd</sup> in Information Communication Technology for Education for Sustainable Development from Frederick University. These degrees have equipped him with knowledge and expertise in curriculum development, leadership, and using ICT tools and appropriate technology for ESD.

Mr. Anwar has conducted numerous training sessions and symposiums on sustainability and ESD, both locally and globally. Currently, he serves as the director of Heliopolis University Centre for Rural Development and has previously served as the director of the ESD Centre at Heliopolis University for three years. Moreover, he teaches a mandatory course on sustainable development for all university students from all disciplines, which showcases his dedication and passion for educating and fostering sustainable development practices.

Mr. Anwar is a consultant for ESD and sustainability projects with UNESCO, GIZ, Erasmus and American University in Egypt. He also a guest speaker in different universities in Egypt with focus on sustainability issues and ESD competencies.
