PROCESS MINING

Turning Data into Value

Workshop by Celonis, the latest European unicorn
Followed by a Get-Together at due

DATE
13 November 2018

TIME
4 – 6.30 pm

ROOM
EG013

ABOUT PROCESS MINING

Process mining is one of the fastest evolving data analytics technologies that enables companies to reconstruct, analyze, and improve their processes based on event logs. Process mining thereby bridges the gap between model-based process analyses and data-centric analysis techniques.

Explore the vast possibilities of process mining here.

Discover how process mining can be used to improve the Purchase-to-Pay process here.

WORKSHOP OUTLINE

- About Celonis – A start-up success story
- Theoretical foundations of process mining technology
- Live demo and hands-on exercises
- Creating business value with process mining and transforming supply chains
- Use cases and requirements for successful application of process mining

To be able to participate in the hands-on session, it is important to **bring your laptop** with you and to **register for the Celonis Academic Cloud beforehand!**

ACCESS TO CELONIS ACADEMIC CLOUD

1. Fill out the registration form:
   https://academiccloud.celonis.com/login/register
2. Use your **official academic email address**.
3. Verify your email address by clicking on the 'Verify' button in the automatic email. Please **check your spam folder** if you did not receive the verification email.
4. Login at https://academiccloud.celonis.com/ and start process mining in the Academic Cloud.
