

## Tax Policy

In this course, we will discuss how states should set their tax policies. In more detail, we will speak about topics like optimal income tax rates, tax evasion, the influence of taxation to risk-taking and international tax competition. We will use advanced theoretical models and discuss recent empirical findings. Therefore, you should have a solid knowledge of the mathematics used in economics (esp. maximization under constraints).

Here you can find the evaluation results of the [lecture](#) (QI 87.9) and the [tutorial](#) (QI 86.1) in the summer term 2017.

**Target group:** Elective course for students studying the FACT Master

**Term:** Summer term (expected to start from 2020)

**Time and Room:** -

Dates and changes see [KU Campus](#)

**Instructor:** Prof. Dr. Langemayr

**ECTS:** 5 ECTS

**Language:** English

**Restrictions:** none

**Registration:** Exam registration via [Flex-Now](#)

**Course Description:** See this [PDF](#)

**Course Documents:** See Ilias

**Grading:** Solutions to (at least) 3 problems sets (30 %) and written exam (70%)

**Exam Dates:** -
