

Quantitative Methods

The “Quantitative Methods” minor offers students comprehensive insight into statistical methods, econometrics and quantitative aspects of business and economics. By choosing this minor, students will be comprehensively prepared for a profession in taxation advice (e.g. in international organizations) or for working in research in the area of taxation. This minor is also particularly recommended for students who would like to pursue doctoral studies in the field of taxation. It is also a valuable choice for all those who are interested in the professional field of transfer pricing.
