

Center for Entrepreneurship

The Center for Entrepreneurship at the Catholic University of Eichstätt-Ingolstadt would like to satisfy the growing needs of scientific, business and social interest groups for more entrepreneurial activities and develop entrepreneurship further in research, practice and teaching in an interdisciplinary way. Thus, a bridge between science and regional, domestic and international business should be built in the context of social challenges to allow an interactive exchange of experiences, opinions and knowledge among these different players. A special focus in all of this is placed on regional and site development problems.

The objectives of the Center for Entrepreneurship at the Catholic University of Eichstätt-Ingolstadt are specified as follows:

- Long-term institutional bundling of know-how in the area of entrepreneurship and public-private cooperation.
- Development of a network between the Center for Entrepreneurship, the various university schools, their students and graduates, as well as public and business stakeholders.
- Consideration of content-related networking of entrepreneurship and value management.
- Sustainable creation of an exchange of experiences and knowledge by setting up a discussion platform between entrepreneurial practice, academic research and teaching, for example.
- Development of a culture of entrepreneurial independence among students.
- Foster new concepts for expanding regional entrepreneurship.
