

Forum K'Universale Eichstätt-Ingolstadt

The **Forum K'Universale Eichstätt-Ingolstadt** is a project based at the Catholic University of Eichstätt-Ingolstadt which was started in 2011 and has the interdisciplinary objective of strengthening and developing the University's profile through cooperation between students and lecturers. The small working group which has initiated the project and which consists of Professors at the University has decided to tackle current critical and socially relevant topics and questions by approaching them both from a Catholic "K" aspect and an interdisciplinary perspective. Like this, the basic ideal of university life is taken into account which strives for imparting knowledge within the meaning of an overarching ("Catholic") and general ("universal") education.

Forum K'Universale chooses a different annual theme each year which is presented in the winter semester in form of an interdisciplinary lecture series and approached in detail during the summer semester in accompanying subject-specific seminars. At the same time, the contributions to the annual themes are published in an own series.

The interdisciplinary focus of the forum creates an open space for encounter accessible to all in which research and teaching, religion and science as well as individuals and society are confronted with each other and invited to fruitful cooperation.
